

FOR IMMEDIATE RELEASE:

Upstream Network Expands Its Team in Chicago and South Florida

OAK BROOK, Illinois (Dec. 14, 2017) — Upstream Network announces the addition of new team members this week in two of its key markets – Chicago and South Florida.

Spencer Ohleyer, South Florida
Andrea Reyes, South Florida
Joe Binkley, Chicago
Jacob Gordon, Chicago

Each of these new team members has extensive multi-family telecom experience with Comcast, RCN, Atlantic Broadband and HotWire Communications.

“We are very excited to be expanding our team to support the type of growth we are already generating,” stated Bryan J. Rader, President of Upstream Network. “The MDU market is clearly looking for a better way to provide a high speed broadband experience to their residents, and the larger providers are not meeting this demand. Our new platform is resonating across our footprint.”

“I joined Upstream because it is the right platform at the perfect time in our industry,” explained Ohleyer, “I am excited to represent Upstream in the South Florida region.”

Upstream has grown rapidly this year after its summertime launch, with several thousand MDU units slated for deployment in early 2018.

Upstream Network was developed to provide users with a concierge-quality experience at the fastest speeds, supported by first-class service and technical support, and is the first cloud-based smart network especially designed for the MDU market. Upstream’s industry-leading platform offers comprehensive internet in combination with digital TV packages and personalized guidance to help property managers develop a tailored solution for their residents’ broadband preferences with customized content, concierge-quality service and maximum security. With an in-house, 24/7 U.S.-based customer support team, Upstream provides end-to-end service for communities across different types of properties, including design, installation, maintenance, and service management. Based in Oak Brook, Illinois, Upstream Network serves 3000+ properties across the nation, with hubs in Chicago and Florida. For more information, visit online at www.upstream.network.
